Club AutoRape 01/04/2000 Rib Rufus 2015-05-22 What you are about to read takes place on a distant parallel earth whereupon automobiles so happen to be living creations. There exists upon this parallel earth a collective of six individuals who refer to themselves as Club AutoRape. They do not see the automobile in the same light as many others and find its existence to be utterly offensive. In a quest to gather the necessary resources to one day give an automobile the kind of treatment it so deserves, these individuals managed to utilize a sliding device and a top-secret military program to their advantage. They have constructed a compound existing on a parallel earth designed for the sole purpose of disciplining the automobile. These individuals have furthermore taken advantage of a top-secret military program in which they have become what could only be considered as redesigned humans with android properties. Using the very best of cybernetics and nanotechnology, these individuals have been given the ability to alter their strength and their heights at will. With the ability to reach heights of twenty feet, one of these individuals could theoretically rip a car apart with his bare hands. It took these individuals ten years to construct a compound so designed to make what would otherwise be nothing but a fantasy a reality. These are the stories of these individuals and the cars they have captured for discipline. It is advised to first read the introductory story, then feel free to indulge in the torture and destruction of an automobile.

Mazda RX-7 Performance Handbook Mike Ancas

Honda Engine Swaps Aaron Bonk 2007-02-01 When it comes to their personal transportation, today's youth have shunned the large, heavy performance cars of their parents' generation and instead embraced what has become known as the "sport compact"--smaller, lightweight, modern sports cars of predominantly Japanese manufacture. These cars respond well to performance modifications due to their light weight and technology-laden, high-revving engines. And by far, the most sought-after and modified cars are the Hondas and Acuras of the mid-'80s to the present. An extremely popular method of improving vehicle performance is a process known as engine swapping. Engine swapping consists of removing a more powerful engine from a better-equipped or more modern vehicle and installing it into your own. It is one of the most efficient and affordable methods of improving your vehicle's performance. This book covers in detail all the most popular performance swaps for Honda Civic, Accord, and Prelude as well as the Acura Integra. It includes vital information on electrics, fit, and drivetrain compatibility, design considerations, step-by-step instruction, and costs. This book is must-have for the Honda enthusiast.

Comeback Paul Ingrassia 2013-05-14 In Comeback, Pulitzer Prize-winners Paul Ingrassia and Joseph B. White take us to the boardrooms, the executive offices, and the shop floors of the auto business to reconstruct, in riveting detail, how America's premier industry stumbled, fell, and picked itself up again. The story begins in 1982, when Honda started building cars in Marysville, Ohio, and the entire U.S. car industry seemed to be on the brink of extinction. It ends just over a decade later, with a remarkable turn of the tables, as Japan's car industry falters and America's Big Three emerge as formidable global competitors. Comeback is a story propelled by larger-than-life characters -- Lee Iacocca, Henry Ford II, Don Petersen, Roger Smith, among many others -- and their greed, pride, and sheer refusal to face facts. But it is also a story full of dedicated, unlikely heroes who struggled to make the Big Three change before it was too late.
