*Black & Decker The Complete Guide to Contemporary Sheds* Philip Schmidt 2008-01-15 A modern guide to classic outdoor structures. Sheds and other landscape shelters have never been out of style, but they are now seeing a remarkable surge in popularity, and are being used in creative new ways. The common garden shed is now just as likely to serve as a workshop for an artist to pursue his or her hobby; or may be used as a writerÆs retreat; or may even be equipped with a satellite dish, high definition television, recliners, and used as a meeting spot for Sunday afternoon football parties. In many parts of the country, spacious sheds are being fully appointed with furnishings and used as detached rooms for everyday living or as backyard offices. This book offers readers fuel for their aspirations but also provides practical information for planning and building sheds of all types. Although the basics of stick-building are covered, the book focuses more on the most common consumer option: ordering and buying a kit shed, working from blueprint plans, and customizing the shed to individual needs. Features a planning and design section to help readers create unique shed projects General technique chapter provides an in-depth overview of each step in shed construction Includes easy-to-follow plans and directions for 12 sheds covering all design options Bonus appendix includes a dozen advanced shed plans that can be special-ordered More than three times as many complete plans than any other sheds book

Compact Utility Tractors Dennis David 2013-06-01 Compact Utility Tractors, or CUTs, are cute little cutters! As farming became more refined so did the needs of tractors. The answer was a smaller, more maneuverable and fuel-efficient tractor with a variety of implements and attachments. With this focus on special needs, attachments became available such as plows, disc harrows, mower decks, cultivators, spreaders, snowblowers, and more. They have become a necessary utility for farmers, orchards, small construction jobs, and landscaping/maintenance for estates, parks and golf courses. At the forefront of this evolution was the Farmall Cub and John Deere Model L. Then came the Japanese invasion; a new kind of tractor by companies such as Yanmar and Kubota. These four-wheel drive machines were rugged and tough and used a variety of hydraulically powered attachments. American companies like John Deere, International Harvester, and Massey Ferguson built their own their own four-wheel versions. Today's compact tractors, such as the Kubota BX series, Massey Ferguson's GC series, and the John Deere 3000, offer an even larger selection of implements for special purposes.
