The Taig/Peatol Lathe Tony Jeffree
2019-12-20 The Taig Micro Lathe, known as the Peatol Lathe in the UK, is a popular

"desk-top" lathe, widely used in a variety of applications from clockmaking and model engineering through to pen-turning and pool cue manufacture. Its simplicity, sound

engineering, and rugged design, coupled with a very competitive price, have gained it an enthusiastic following worldwide. In this book, the basics of setting up and adjusting the lathe are covered, and the wide range of standard accessories are described. The later sections describe a range of enhancements that can be made to the lathe to increase its versatility, along with further accessories that the owner can make using the lathe. Tony Jeffree has owned and used a Taig lathe for several years, during which time he has written a number of articles about the lathe and other aspects of model engineering, for *Model Engineer* and *Model Engineers' Workshop* magazines.

The marked

improvement was owing to the restoration of financial discipline, a strengthening of international bauxite prices, and the unification and subsequent stabilization of the exchange rate. The inflation fell further to less than 1 percent in 1996.
