The English Baccalaureate Great Britain: Parliament: House of Commons: Education Committee 2011-07-28 This report suggests that any new performance or curriculum measures affecting schools should only be implemented after proper consultation with key stakeholders and the wider public - something which didn’t happen with the English Baccalaureate (EBac). The Committee says that the Government should also have waited until after the conclusion of the National Curriculum Review before introducing the EBac. They want the Government to deliver on its promise in the White Paper - The Importance of Teaching - to use performance tables to put greater emphasis on the progress of every child. The report notes that “certain academic subjects studied at A-level are more valued by Russell Group universities than others”, but argues that a “focus on a fairly narrow range of subjects, demanding considerable curriculum time, is likely to have negative consequences on the uptake of other subjects.” The Committee does not make recommendations on which subjects should or should not be included but rather encourages the Government to reconsider the EBac’s composition when the National Curriculum Review is concluded. The Government should confirm how it will monitor the attainment of children on free school meals in the EBac. The report also calls for further international evidence to inform debate on the merits of the EBac: evidence the inquiry received did not suggest a link, in other countries, between the prescribed study of certain academic subjects and improved attainment and prospects for poorer students. Elsewhere, the report argues that the current arrangements for certification of the EBac should be shelved, as should calls for a Technical Baccalaureate to sit alongside the existing award.

Advanced Problems in Mathematics Stephen Siklos 2020-10-09 This new and expanded edition is intended to help candidates prepare for entrance examinations in mathematics and scientific subjects, including STEP (Sixth Term Examination Paper). STEP is an examination used by Cambridge Colleges for conditional offers in mathematics. They are also used by some other UK universities and many mathematics departments recommend that their applicants practice on the past papers even if they do not take the examination.Advanced Problems in Mathematics bridges the gap between school and university mathematics, and prepares students for an undergraduate mathematics course. The questions analysed in this book are all based on past STEP questions and each question is followed by a comment and a full solution. The comments direct the reader’s attention to key points and put the question in its true mathematical context. The solutions point students to the methodology required to address advanced mathematical problems critically and independently.This book is a must read for any student wishing to apply to scientific subjects at university level and for anyone interested in advanced mathematics. This work was published by Saint Philip Street Press pursuant to a Creative Commons license permitting commercial use. All rights not granted by the work’s license are retained by the author or authors.

The Physics of Glaciers W. S. B. Paterson 2016-10-27 This updated and expanded version of the second edition explains the physical principles underlying the behaviour of glaciers and ice sheets. The text has been revised in order to keep pace with the extensive developments which have occurred since 1981. A new chapter, of major interest, concentrates on the deformation of subglacial till. The book concludes with a chapter on information regarding past climate and atmospheric composition obtainable from ice cores.
