**Operation Jubilee** Patrick Bishop 2021-10-19 In the tradition of Ben Macintyre, Tim Cook, and other bestselling World War Two historians, a riveting and updated telling of the tragic Dieppe raid of 1942. On the moonless night of August 18th 1942 a flotilla pushes out into the flat water of the Channel. They are to seize the German-held port of Dieppe and hold it for at least twenty-four hours, showing the Soviets the Allies were serious about a second front

and to get experience ahead of a full-scale invasion. But confidence turned to carnage with nearly two thirds of the attackers dead, wounded or captured. The raid - the Royal Air Force's biggest battle since 1940- was both a disaster and a milestone in the narrative of the war. It was cited as essential to D-Day, but the tragedy was all too predictable. Using first-hand testimony and highlighting recently declassified source material from archives across several countries, bestselling author Patrick Bishop's account of this doomed endeavour reveals the big picture and unearths telling details that fully bring Operation Jubilee to life for the first time.

**Tupperware** Alison J. Clarke 2014-09-30 From Wonder Bowls to Ice-Tup molds to Party Susans, Tupperware has become an icon of suburban living. Tracing the fortunes of Earl Tupper's polyethylene containers from early design to global distribution, Alison J. Clarke explains how Tupperware tapped into potent commercial and social forces, becoming a prevailing symbol of late twentieth-century consumer culture. Invented by Earl Tupper in the 1940s to promote thrift and cleanliness, the pastel plasticwares were touted as essential to a postwar lifestyle that emphasized casual entertaining and celebrated America's material abundance. By the mid-1950s the Tupperware party, which gathered women in a hostess's home for lively product demonstrations and sales, was the foundation of a multimillion-dollar business that proved as innovative as the containers themselves. Clarke shows how the "party plan" direct sales system, by creating a corporate culture based on women's domestic lives, played a greater role than patented seals and streamlined design in the success of Tupperware.

**Reconstructing Public Housing** Matthew Thompson 2020 Reconstructing Public Housing unearths Liverpool's hidden history of radical alternatives to municipal housing development and builds a vision of how we might reconstruct public housing on more democratic and cooperative foundations. In this critical social history, Matthew Thompson brings to light how and why this remarkable city became host to two pioneering social movements in collective housing and urban regeneration experimentation. In the 1970s, Liverpool produced one of Britain's largest, most democratic and socially innovative housing co-op movements, including the country's first new-build co-op to be designed, developed and owned by its member-residents. Four decades later, in some of the very same neighbourhoods, several campaigns for urban

community land trusts are growing from the grassroots - including the first ever architectural or housing project to be nominated for and win, in 2015, the artworld's coveted Turner Prize.

Thompson traces the connections between these movements; how they were shaped by, and in turn transformed, the politics, economics, culture and urbanism of Liverpool. Drawing on theories of capitalism and cooperativism, property and commons, institutional change and urban transformation, Thompson reconsiders Engels' housing question, reflecting on how collective alternatives work in, against and beyond the state and capital, in often surprising and contradictory ways.

**How to Turn Down a Billion Dollars** Billy Gallagher 2018-02-13 "In the grand tradition of Ben Mezrich's The Accidental Billionaires (2009)... an engaging look into a fascinating subculture of millions." —Booklist "Breezy...How to Turn Down a Billion Dollars ably if uncritically chronicles the short history of a young company catering to young users, with a young chief executive, and reveals, intentionally or not, the limitations that come with that combination." —Wall Street Journal The improbable and exhilarating story of the rise of Snapchat from a frat boy fantasy to a multi-billion dollar internet unicorn that has dramatically changed the way we communicate. In 2013 Evan

Spiegel, the brash CEO of the social network Snapchat, and his co-founder Bobby Murphy stunned the press when they walked away from a three-billion-dollar offer from Facebook: how could an app teenagers use to text dirty photos dream of a higher valuation? Was this hubris, or genius? In *How to Turn Down a Billion Dollars*, tech journalist Billy Gallagher takes us inside the rise of one of Silicon Valley's hottest start-ups. Snapchat developed from a simple wish for disappearing pictures as Stanford junior Reggie Brown nursed regrets about photos he had sent. After an epic feud between best friends, Brown lost his stake in the company, while Spiegel has gone on to make a name for himself as a visionary—if ruthless—CEO worth billions, linked to celebrities like Taylor Swift and his wife, Miranda Kerr. A fellow Stanford undergrad and fraternity brother of the company's founding trio, Gallagher has covered Snapchat from the start. He brings unique access to a company Bloomberg Business called “a cipher in the Silicon Valley technology community.” Gallagher offers insight into challenges Snapchat faces as it transitions from a playful app to one of the tech industry's preeminent public companies. In the tradition of great business narratives, *How to Turn Down a Billion Dollars* offers the definitive account of a company whose goal is no less than to remake the future of entertainment.

Camping Grounds Phoebe S.K. Young 2021-04-01  
An exploration of the hidden history of camping in American life that connects a familiar recreational pastime to camps for functional needs and political purposes. Camping appears to be a simple proposition, a time-honored way of getting away from it all. Pack up the car and hit the road in search of a shady spot in the great outdoors. For a modest fee, reserve the basic infrastructure--a picnic table, a parking spot, and a place to build a fire. Pitch the tent and unroll the sleeping bags. Sit under the stars with friends or family and roast some marshmallows. This book reveals that, for all its appeal, the simplicity of camping is deceptive, its history and meanings far from obvious. Why do some Americans find pleasure in sleeping outside, particularly when so many others, past and present, have had to do so for reasons other than recreation? Never only a vacation choice, camping has been something people do out of dire necessity and as a tactic of political protest. Yet the dominant interpretation of camping as a modern recreational ideal has obscured the connections to these other roles. A closer look at the history of camping since the Civil War reveals a deeper significance of this American tradition and its links to core beliefs about nature and national belonging. *Camping Grounds* rediscovers unexpected and interwoven histories of sleeping outside. It uses extensive research to trace

surprising links between veterans, tramps, John Muir, African American freedpeople, Indian communities, and early leisure campers in the nineteenth century; tin-can tourists, federal campground designers, Depression-era transients, family campers, backpacking enthusiasts, and political activists in the twentieth century; and the crisis of the unsheltered and the tent-based Occupy Movement in the twenty-first. These entwined stories show how Americans camp to claim a place in the American republic and why the outdoors is critical to how we relate to nature, the nation, and each other.
