The Shock Doctrine Naomi Klein 2009-03-18 The shock doctrine is the unofficial story of how the "free market" came to dominate the world, from Chile to Russia, China to Iraq, South Africa to Canada. But it is a story radically different from the one usually told. It is a story about violence and shock perpetrated on people, on countries, on economies. About a program of social and economic engineering that Naomi Klein calls "disaster capitalism." Based on breakthrough historical research and 4 years of reporting in disaster zones, Klein explodes the myth that the global free market triumphed democratically, and that unfettered capitalism goes hand-in-hand with democracy. Instead, she argues it has consistently relied on violence and shock, and reveals the puppet strings behind the critical events of the last 40 years. "The shock doctrine" is the influential but little understood theory that in order to push through profoundly unpopular policies that enrich the few and impoverish the many, there must be a collective crisis or disaster—real or manufactured. Klein vividly traces the origins of modern shock tactics to the economic lab of the University of Chicago under Milton Friedman in the 60s, and beyond to the CIA-funded electroshock experiments at McGill in the 50s which helped write the torture manuals used today at Guantanamo Bay. She details the events of the recent past that have been deliberate theatres for the shock doctrine: among them, Pinochet's coup in Chile in 1973, the Tiananmen Square Massacre in 1989, the collapse of the Soviet Union in 1991; and, more recently, the September 11 attacks, the invasion of Iraq, the Asian tsunami and Hurricane Katrina. And she shows how—in the hands of the Bush Administration—the "war on terror" is a thin cover for a thriving destruction/reconstruction complex, with disasters, wars and homeland security fuelling a booming new economy. Naomi Klein has once again written a book that will change the way we see the world.

Field and Service Robotics Alonzo Kelly 2010-06-28 Robotics is undergoing a major transformation in scope and dimension. From a largely dominant industrial focus, robotics is rapidly expanding into human environments and vigorously engaged in its new challenges. Interacting with, assisting, serving, and exploring with humans, the emerging robots will increasingly touch people and their lives. Beyond its impact on physical robots, the body of knowledge robotics has produced is revealing a much wider range of applications reaching across diverse research areas and scientific disciplines, such as: biomechanics, haptics, neurosciences, virtual simulation, animation, surgery, and sensor networks among others. In return, the challenges of the new emerging areas are proving an abundant source of stimulation and insights for the field of robotics. It is indeed at the intersection of disciplines that the most striking advances happen. The Springer Tracts in Advanced Robotics (STAR) is devoted to bringing to the research community the latest advances in the robotics field on the basis of their significance and quality. Through a wide and timely dissemination of critical research developments in robotics, our objective with this series is to promote more exchanges and collaborations among the researchers in the community and contribute to further advancements in this rapidly growing field.

ICWIM6 Bernard Jacob 2013-01-29 After Zurich (1995), Lisbon (1998), Orlando (2002), Taipei (2005) and Paris (2008), the International Conference on Weigh-In-Motion (ICWIM6) returns to North America to join with the North American Travel Monitoring Exhibition and Conference (NATMEC 2012). International WIM conferences are organized by the International Society for Weigh-In-Motion (ISWIM). The conference addresses the broad range of technical issues related to weighing sensors and systems, weight data management and quality assurance, enforcement, road operation and infrastructure related issues. It provides access to current research and best practices, in an international forum for WIM technology, standards, research, policy and applications. Heavy vehicle mass monitoring, assessment and enforcement are key actions to ensure road safety and fair competition in freight transport, facilitating the inter-modality, and to design and maintain reliable and durable road infrastructures, with a better compliance of weights and dimensions. WIM is becoming part of a global ITS for heavy traffic management, contributing to reduce the environmental impact of freight transport and to a better use of the existing road networks.

Facing Addiction in America Office of the Surgeon General 2017-08-15 All across the United States, individuals, families, communities, and health care systems are struggling to cope with substance use, misuse, and substance use disorders. Substance misuse and substance use disorders have devastating effects, disrupt the future plans of too many young people, and all too often, end lives prematurely and tragically. Substance misuse is a major public health challenge and a priority for our nation to address. The effects of substance use are cumulative and costly for our society, placing burdens on workplaces, the health care system, families, states, and communities. The Report discusses opportunities to bring substance use disorder treatment and mainstream health care systems into alignment so that they can address a person's overall health, rather than a substance misuse or a physical health condition alone or in isolation. It also provides suggestions and recommendations for action that everyone—individuals, families, community leaders, law enforcement, health care professionals, policymakers, and researchers—can take to prevent substance misuse and reduce its consequences.

The Crazy Crumpet Kerfuffle Jo Simmons 2015-03-05 Welcome to Pip Street! The very ordinary place where extraordinary things happen. Full of quirky black-and-white illustrations throughout, as well as fun activity sheets at the back. Can crumpets be cool? When Bobby's dad becomes the manager of the local crumpet factory, Bobby thinks his moving worries are at last over. He likes it here on Pip Street, especially now he has found a new best friend in fizzy Imelda from next door. Except crumpets are boring! And no one is buying them. Unless someone (and I bet it'll have to be Bobby) comes up with a fantabulous plan to make crumpets more interesting. Bobby's dad might lose his job and that means ... uh-oh ... moving again. And who's that even newer boy across the street acting like he's better than everyone else, and making eyes at Imelda and trying to be her best friend instead? Looks like there's a crumpety calamity on Pip Street!
