User-designed Computing Louis Schlueter 1982 This book examines the term 'real-time information' and distinguishes it as 'real-control information' while looking at the problems associated with computerizing real-control information, and making the end-user the architect of their own systems. This book explains how data-processing management can deliver large-scale, user-oriented computer services and yet effectively manage the related computer resources and provide system safety.

Northrop F-89 Scorpion Pilot's Flight Operating Manual United States Air Force 2008-09-01 The F-89 Scorpion was the first multi-seat, all-weather jet interceptor in the U.S. Air Force. It also became the first aircraft ever equipped with a nuclear air-to-air weapon & the 1.5 kiloton Genie missile. The F-89 made its debut in 1948, joined the Air Force in 1950, and then served as the mainstay of Air Defense Command for 17 years. Over 1,000 F-89s were produced, including 350 of the à model equipped with pylons to carry the Genie. (One F-89 did fire the missile as part of Operation Plumbob in 1957.) Originally printed by Northrop and the USAF, this F-89 Flight Operating Manual taught pilots everything they needed to know before entering the cockpit. Classified àRestrictedà, the manual was recently declassified and is here reprinted in book form. This affordable facsimile has been reformatted and color images appear in black and white. Care has been taken however to

preserve the integrity of the text.

NATFREQ Users Manual Wilfred D. Iwan 1984 This manual describes a computer program that has been developed to calculate natural frequencies and mode shapes of taut cables with attached masses and spring-mass combinations. The equations of motion are solved by an iterative technique allowing accurate calculation even for extremely high mode numbers. The approach has the advantages that it is fast, accurate, and can easily accommodate a variety of system configurations including bodies attached to the cable. This document covers the theory used in the development of the code. Line-by-line descriptions of both the input and output data are given, and several examples illustrating the use of the program are included. Some of the difficulties that may be encountered when running large, complex problems are discussed and possible solutions proposed. The structure of the program is described in moderate detail. The program is written in a style which makes additions or modifications easy to implement. (Author).

A-7 Corsair Pilot's Flight Operating Manual United States Navy 2008-09-01 ought's A-7 Corsair II served the U.S. Navy for over over two decades, and flew with distinction during the Vietnam conflict. The subsonic A-7 was based on Chance Vought's supersonic F-8 Crusader. It boasted a heads-up display, an inertial navigation system, and other innovations. The plane entered service in 1966, and served in Vietnam in late 1967. Its performance was impressive. The USS Ranger's VA-147 flew over 1,400 sorties with the loss of only one aircraft. The Air Force purchased an advanced version, the A-7D, equipped with a more powerful engine. The plane later flew missions over Lebanon, Libya, Grenada, Panama, and Iraq. The last planes in U.S inventory were retired in 1991. Originally printed by the U.S. Navy and Vought, this handbook for the A-7 provides a fascinating glimpse inside the cockpit of this famous aircraft. Originally classified 'restricted', the manual was recently declassified and is here reprinted in book form.

Marketing for Entrepreneurs Jurgen Wolff 2012-12-27 Entrepreneurs are great at coming up with new ideas and, often by sheer passion alone, getting their business started. But for long-term success they must be aware of the secrets of marketing. Even if they don't always market their product themselves, they need to understand the processes enough to ensure that the job is being done well. The book identifies marketing as the entire process of researching, creating, distributing and selling the product or service. It isn't about theory and metrics; instead, it's a practical guide that starts with the basis of all marketing: the proper mindset. The book: de-mystifies branding, showing how it is never a process undertaken for its own sake (or for creating sexy brochures or websites), but in order to burn the uniqueness of the business into the minds of customers. offers an extensive toolkit that includes the power of outsourcing and networking and the latest techniques in establishing rapport, communicating with the use of questions, and the power of language patterns in speech and written copy. shows how to use both new and old media to best effect, with special attention to blogs, podcasts, viral videos, and social networking sites. shows how to put all of these elements together into a marketing master plan that you can formulate a one-year plan and then break down into a six-month, three month, and one month segments.
